#### (IV) Employee benefits

Pension cost for an interim period is calculated on a year-to-date basis by using the actuarially determinedpension cost rate at the end of the prior financial year. If there are significant market changes, significant reductions, liquidations, or other significant one-time events after the end of the period, they will be adjusted. Relevant information will be disclosed in accordance with the aforementioned policies.

#### (V) Income tax

The income tax expense for the interim period is calculated by applying the estimated annual average effective tax rate to the pre-tax profit of the interim period. Relevant information is disclosed in accordance with the aforementioned policies.

#### (VI) Share capital(Buyback)

When the Company repurchases issued shares, the consideration paid, including any directly attributable incremental costs, is recognized as a reduction in shareholders' equity on a net after-tax basis. When the repurchased shares are subsequently reissued, the difference between the consideration received after deducting any directly attributable incremental costs and income tax effects and the carrying amount is recognized as an adjustment to shareholders' equity.

#### V. Primary Sources of Uncertainties in Material Accounting Judgments, Estimates, and Assumptions

The above aging analysis is based on the number of days overdue.

- 2. The balances of accounts and notes receivable as of September 30, 2024, December 31 and September 30, 2023 were generated from customer contracts, and the balance of accounts receivable under customer contracts as of January 1, 2023 was NT\$ 1,823,506.
- 3. The bills receivable transferred by the Group are all bank acceptance bills given by the customer. According to a FAQ issued by Securities and Futures Bureau on December 26, 2018, "Whether the transfer of notes receivable in Mainland China can be derecognized?", assess the credit rating of the accepting bank that received the banker's acceptance. Banker's acceptances with a higher credit rating of the accepting bank usually have less credit risk and late payment risk. The main risk associated with a banker's acceptance is interest rate risk, and interest rate risk has been transferred with an endorsement of notes. It is able to judge that almost all risks and rewards of ownership of banker's acceptances have been transferred. Therefore, the endorsement of the banker's acceptance transferred to the supplier is eligible for derecognition. The discounted and transferred notes are reported as a deduction for notes receivable.
- 4. Without taking into account the collateral or other credit enhancements held, the accounts and notes receivable that best represents the Group at the maximum exposure to credit risk were NT\$1,542,430, NT\$1,495,109 and NT\$1,888,075 as at September 30, 2024, December 31 and September 30, 2023 respectively.
- 5. For information on the transfer of financial assets, please refer to Note 6 (5) for details.
- 6. For aging analysis and credit risk information of accounts and notes receivable, please refer to Note 12, (2) and (3) for details.
- 7. The Group has not provided any notes receivable and accounts receivable as pledge guarantee.

#### (V) Transfer of financial assets

The Group has entered into contracts with financial institutions for the sale of accounts receivable. According to the contract, the Group is not required to bear the risk of irrecoverability of these transferred accounts receivable, but is only required to bear the losses caused by commercial disputes. The Group does not have any further involvement in these transferred accounts receivable. Therefore, the Group excludes the accounts receivable transferred, and the relevant information of those which have not yet matured are as follows:

1. The Group holds 40% of the shares of Zhejiang Airmate Electric Sales Co., Ltd. (hereinafter referred to as Zhejiang Airmate Company). Because other single major shareholders (not related parties) hold 60% of the shares, it shows that the Group has no actual ability to lead related activities, so it is judged that it has no control over the company and only has a significant impact.

2. The realized (unrealized) gross profit from the sidestream transactions of the Group from July 1 to September 30, 2024 and 2023, and January 1 to September 30, 2024 and 2023 arising from the sales to the associates company Zhejiang Airmate Company are as follows:

#### (XXV) Retained Earnings

- 1. In accordance with the Articles of Incorporation of the Company, during the period when the Company's shares are listed for sale on a trading platform or are listed on the Stock Exchange, the Board of Directors shall, when proposing the distribution of surplus earnings, make provision for the following from the surplus earnings of each fiscal year:
  - (i) Provision for the payment of the relevant tax for the fiscal year;
  - (ii) Amount to offset past losses;
  - (iii) 10% surplus reserve (referred to as "statutory surplus reserve" below) (unless the statutory surplus reserve has reached the paid-in capital of the Company); and
  - (iv) Special Reserve as required by the securities supervisory authority in accordance with the rules on company with public issuance.

When the Company is required to set aside special reserves by the securities supervisory authority in accordance with the rules on company with public issuance, the net amount of other equity deductions and the net increase in the fair value of investment properties held by the Company recognized in previous cumulations should set aside the same amount of special reserve as the undistributed earnings from the previous period. If it is insufficient, the amount of undistributed earnings in the current period shall be set aside by including net profit after tax plus other items other than net profit after tax in the current period.

The Company's dividend distribution policy takes into account factors such as the current and future investment environment, capital requirements, industry competition, and capital budget. It aims to balance shareholder's interests with the Company's longterm financial planning. The principle of dividend distribution is not less than 25% of the "distributable earnings in the current period" (this percentage is referred to as the "dividend distribution base ratio"). Dividends are then distributed to shareholders based on their shareholding ratio. Dividends distributed to shareholders shall be a combination of stock dividends and cash dividends; however, the proportion of cash dividend shall not be less than 10% of the total dividend distributed. However, (i) when the Board of Directors, after considering the aforementioned factors, deems it appropriate to adopt a conservative dividend policy for the current year, dividends may be distributed to shareholders within a range not lower than 50% of the aforementioned dividend distribution base ratio, with the proportion of cash dividend not less than 10% of the total dividend distribution. (ii) If the "distributable earnings in the current period" is less than 5% of the paid-in capital, no distribution shall be made, and this shall be submitted for resolution at the shareholders' meeting.

"Distributable earnings in the current period" mentioned in the previous paragraph refers to the earnings for the current year, which, as per the above regulations, the earnings after paying the taxes, offsetting previous years' losses, setting aside legal reserve and special reserves and excluding the accumulated undistributed earnings from the beginning of the current period.

Dividends and bonuses, capital surplus or legal reserve in whole or in part may be paid in cash after a resolution has been adopted by a majority vote at a meeting of the Company's Board of Directors attended by two-thirds of the total number of directors; and in addition thereto a report of such distribution shall be submitted to the shareholders' meeting.

### 2. Legal Reserve

In accordance with provisions of the Company Act, the Company shall contribute 10% of the net profit after tax as a legal reserve unless the legal reserve has reached the paid-in capital of the Company. When there is no loss in the Company, the legal reserve will be used to issue new shares or cash upon resolution at the Shareholders' Meeting, but shall be limited to the part of the reserve that has exceeded 25% of the paid-up capital.

## 3. Special Reserve

The amount of interest arising out of retained earnings of cumulative translation adjustment generated due to financial statement translation of foreign operation under the item of shareholders equity by the Company when applying the exemption item in IFRS No.1 "First-time Adoption of International Financial Reporting Standards" was NT\$185,271 thousand. Besides, in accordance with the provision of FSC Jin-Guan-Zheng-Fa-Zi No. 1010012865 on April 6, 2012, the same amount was recognized as a special reserve, and when relevant assets are used, handled, and re-classified, the earnings are distributed according to the ratio of the original recognized special reserve.

In accordance with the above provisions, in distributing distributable earnings by the Company, the difference between the net amount recognized of other shareholders equity deduction occurred in the current year and the special reserve balance mentioned above is set aside as special reserve from current year profit or loss and previous undistributed earnings; the cumulative other shareholders' equity deduction through previous cumulation is set aside as special reserve that could not be distributed from previous undistributed earnings. Afterward, if other shareholders' equity deduction has been reversed, the reversal shall be applicable to earnings distribution.

#### 4. Earnings distribution

(1) On June 19, 2023, the Shareholders' Meeting resolved the profit distribution plan for year 2022. The details of the dividends distributed to owners of ordinary shares are as follows:

Note: Including insurances like local medicare, unemployment, work injury and birth for subsidiaries in Mainland China.

- 1. In accordance with the provisions of the Articles of Incorporation of the Company, unless otherwise provided by the Cayman Company Law, the Rules on Public Offering Company or Articles of Incorporation, if the Company is profitable at a particular fiscal year, the remuneration of employees and directors shall be allocated as follows. However, when the Company is at a cumulative loss, an amount shall first be retained to offset its loss.
  - (a) One percent to ten percent for the remuneration of employees, including employees of affiliated companies; and
  - (b) Not more than three percent for the remuneration of directors (not including independent directors).

Distribution of the employees' and directors' remuneration shall be resolved at Board of Directors' Meetings, with over two-thirds of directors in attendance and approved by over half of the directors present in the meeting, and reported at the Shareholder's Meeting. However, when the Company is at a cumulative loss, the make-up sum shall first be retained, and then allocate the employees' and directors' remunerations at the percentage mentioned above. The above "profit" refers to the net profit before tax of the Company. For the avoidance of doubt, net profit before tax refers to the amount before payment of remunerations for employees and directors.

Without violating the provisions of any applicable laws, the employees' remunerations shall be in the form of cash or shares.

2. For July 1 to September 30, 2024, and 2023, and January 1 to September 30, 2024, and 2023, the estimated sum of the Company's employee compensation is NT(\$732), NT(\$6,050), NT\$0, and NT\$3,784. The estimated sum of directors' compensation is NT(\$219), NT(\$1,815), NT\$0, and NT\$1,135, which are included under Salary Expense.

The employees' and directors' compensation for year 2023, as resolved by the Board of Directors, were NT\$ 2,092 and NT\$ 628, respectively, which is not different from the amount recognized in employee compensation and director compensation of the 2023 Annual Financial Report.

Information on the remuneration of employees and directors passed by the Board of Directors of the Company can be found at the Market Observation Post System.

## (XXXVI) Operation Seasonality

The primary products of the Group are electric fans and electric heaters, hence the operation is subject to seasonal fluctuation due to weather conditions. Among them, the sales of electric fan in the first quarter of each year is unfavorably influenced by winter weather conditions; downstream customers will order in advance in the second quarter to meet the demand of electric fan in summer and in the fourth quarter to meet the demand for electric heater in winter; in July it will depend on changes in the weather; while in August to December, the sale is stagnant. The Group tries to meet the supply demand for the period through flexible adjustment of the production of electric fans, electric heaters and other products according to the market adjustment, weather changes and customer demand, as well as inventory management satisfy the demand during these period to reduce the seasonal impact.

#### 2. Risk Management Policy

The Group's financial management department provides services to various business units, coordinates access to domestic and international financial markets, and oversees and manages the financial risks associated with the Group's operations through internal risk reporting which analyzes the risk exposure according to their risk level and breadth. The Group uses derivative financial instruments to avoid exposure to risk in order to mitigate the impact of such risks. The use of derivative financial instruments is governed by the policies approved by the Board of Directors of the Group and is governed by the written principles of exchange rate risk, interest rate risk, credit risk, the use of derivative and non-derivative financial instruments and the investment of residual liquidity. The Internal Auditors continuously review the conformity to policies and risk exposure limits. The Group does not deal in financial instruments (including derivative financial instruments) for speculative purposes.

## 3. Nature and extent of material financial risk

#### (1) Market risk

Market risk refers to the risk of changes in market prices, such as changes in exchange rates, interest rates and equity instruments, affecting the Group's earnings or the value of financial instruments held. The objective of market risk management lies in optimizing the investment return by controlling the market risk exposure within the acceptable range.

The Group manages market risk by engaging in derivative transactions and thereby generating financial liabilities. The execution of all transactions must abide by the designated staff authorized by the Board of Directors.

## Exchange rate risk

A. The Group is exposed to exchange rate risk arising from sales, purchases and borrowing transactions that are not denominated in the functional currencies of each Group companies. The functional currency of the Group companies is mainly NTD, followed by RMB and HKD. The main currencies used in these transactions are denominated in NTD, RMB, JPY, USD and HKD.

The Group uses short-term loans and derivative financial instruments to hedge against exchange rate risk in order to avoid a decrease in the value of foreign currency assets and fluctuations in future cash flows due to changes in exchange rates. The use of such derivative financial instruments may assist the Group in reduction, but not the complete elimination of the effects of changes in foreign currency exchange rates. As 50% of the Group's sales region come from China in the recent years and are denominated in RMB, the other 50% mainly come from Europe, USA, Japan and South Korea, and mainly denominated in USD and JPY, while the import is mainly denominated in RMB. Therefore, in addition to the natural hedging of the RMB from the import and sales, the change in the exchange rate of the remaining different currencies still has an offsetting effect. In addition to the natural hedging, the Group also chooses to prevent exchange rate risk through forward foreign exchange contracts and exchange rate option contracts in due time. However, as the Group considers the growth of future operations, the holding of foreign currencies will continue to increase and domestic funds and future dividends distribution to domestic investors are required to be exchanged in USD, so the risk of exchange rate fluctuation of USD against the NTD will arise; therefore, the Group will strengthen the control over foreign exchange, and the possible response measures are as follows:

- (a) Continuously strengthen the concept of foreign exchange hedging among finance personnel, and determine the trend of exchange rate fluctuations using methods such as the real-time online exchange rate system and the strengthening contacts with financial institutions as the basis for reference.
- (b) To the extent possible, make payment for the purchase and related expenses by sales revenue in the same currency to achieve the natural hedging effect.
- (c) Decide whether to adopt derivatives for hedging to avoid exchange rate risks according to the Company's operational status.
- B. The Group's financial assets and liabilities which are exposed to significant foreign currency exchange rate risk (including monetary items in non-functional currency denominations that have been eliminated in the Consolidated Financial Statements) are as follows:

- C. The Group's exchange rate risk arises primarily from cash and cash equivalents, accounts receivable and other receivables, loans, accounts payable and other payables, etc. denominated in foreign currencies, which results in foreign currency exchange gains and losses in translation. From January 1 to September 30, 2024 and 2023, when the value of NTD depreciates or appreciates by 5% against USD, JPY, RMB and HKD, the net profit before tax from January 1 to September 30, 2024 and 2023 would increase or decrease by NT\$29,625 and NT\$38,118, respectively, using the same basis for both periods of analysis and all other factors remained unchanged.
- D. The Group's exchange gains recognized in respect of monetary items from July 1 to September 30, 2024, and 2023, and January 1 to September 30, 2024, and 2023 due to exchange rate fluctuations (both realized and unrealized) totaled at NT8,832, NT(\$34,367), NT(\$44,823), and NT(\$5,918), respectively.

#### Price risk

The Group's equity instruments exposed to price risk refer to financial assets measured at fair value through other comprehensive income. The prices of these equity instruments may be influenced by the uncertainty of the future value of the investment targets. If the prices of these equity instruments rise or fall by 5%, while all other factors remain unchanged, the pre-tax net profit for the period from January 1 to September 30, 2024 and 2023 will increase or decrease by \$2,267 and \$7,897 respectively, due to the gains or losses from equity instruments measured at fair value through profit or loss. The other comprehensive income will increase or decrease by \$122 and \$121 respectively, due to the gains or losses from equity investments classified as fair value through other comprehensive income.

#### Interest rate risk

The Group's borrowings are measured at amortised cost and re-priced annually as contracted, thus exposing the Group to the risk of future changes in market interest rates. The Group's interest rate risk arises from loans at floating interest rates. Currency market interest rates have risen slowly in recent years but the changes in loan rate of the Group's loans is minimal. However, if there is a significant fluctuation in future interest rate trends, and the Group still has demand for loan, in addition to adopting other capital market financing instruments, the Group has to observe interest rate trends and choose to borrow at fixed or floating interest rates to avoid the risk of interest rate fluctuations.

If the loan interest rate increases or decreases by 1% from January 1 to September 30, 2024 and 2023, with all other factors remain unchanged, the increase or decrease in interest expense from the Group's loans floating interest rate will result in a decrease or increase in net profit after tax of NT\$868 and NT\$7 from January 1 to September 30, 2024 and 2023, respectively.

#### (2) Credit risk

The Group's credit risk is the risk of financial loss arising from the inability of a customer or counterparty to meet its contractual obligations, mainly arising from accounts receivable from customers of the Group.

#### Investment

The credit risk of bank deposits (including repayable accounts and pledged time deposits), fixed income investments and other financial instruments are measured and monitored by the Group's Finance Department. As the transacting party and the counterparties of the Group are banks with good creditworthiness and financial institutions with investment grade and above, corporate bodies and government agencies, there are no significant performance concerns and therefore no significant credit risks.

#### Notes receivable, accounts receivable and other receivables

- A. The Group's Finance Department together with the Market Department, establishes a credit policy under which the credit rating of each new customer is analyzed individually before standard payment and delivery terms and conditions are granted according to the policy. The Group's review includes external ratings (if available) and, in certain cases, bank notes. Customers who do not meet the Group's benchmark credit rating may only transact with the Group on an advance receipt basis.
- B. In monitoring the credit risk of customers, the Group categories the customers according to the credit characteristics of the customers, including whether they are individuals or legal entities; whether they are distributors, retailers or end customers; and the scale of operation, distributor target achievement rate and whether there were late payment. The Group's accounts receivable and other receivables are primarily attributed to the Group's customers who are distributors. Customers rated with high risk will be included into the list of restricted customers and put under the monitoring of Market Department, and future sales with this type of customers will be conducted on the advance receipt basis.
- C. The Group has allocated an impairment loss allowance account to reflect the estimated loss on accounts receivable and other receivables. The main components of allowance account include specific loss components related to individual material risk exposure and portfolio loss components for losses already incurred yet unidentified within similar asset group. The portfolio loss allowance account is determined by historical payment statistical data of similar financial assets.
- D. In accordance with the credit risk management procedures of the Group, a breach of contract is deemed to have occurred when the counterparty fails to honour the agreement between the parties without consulting the Company.
- E. The Group applies a simplified approach to the estimation of expected credit losses for all notes receivable and accounts receivable, which are measured using the duration of the expected credit losses. For measurement purposes, these notes

receivable and accounts receivable are grouped according to the common credit risk characteristics of the ability to pay all amounts due on behalf of the customer in accordance with the terms of the contract, and have been included in the forward-looking information such as historical credit loss experience and reasonable expectations of future economic conditions.

The expected credit losses of the Group's notes receivable and accounts receivable are analyzed as follows:

The Group recognized impairment gains (losses) of NT\$5,141, NT\$12,133, NT\$9,994, and NT\$15,152 on receivables arising from customer contracts from July 1 to September 30, 2024, and 2023, and January 1 to September 30, 2024 and 2023, respectively.

G. The Group's credit risk exposure is mainly affected by the individual circumstances of each customer. However, the Management also considers the statistical information of the Group's customer base, including the risk of default in the customer's industry and country, as these factors may affect credit risk.

#### (3) Liquidity risk

- A. Liquidity risk is the risk that the Group will not be able to settle its financial liabilities in cash or other financial assets and not able to meet the relevant obligations. The Group's approach to managing liquidity is to ensure, to the extent possible, that the Group has sufficient liquidity to meet its liabilities as they fall due under both normal and pressuring circumstances, without incurring unacceptable losses or exposing the Group to reputational damage.
- B. The Group ensures that sufficient cash is available to meet the anticipated operating expense requirements for 60 days, including the fulfilment of financial obligations, but excludes potential impacts that cannot be reasonably expected in extreme circumstances, such as natural disasters. In addition, the Group's unused lines of credit on September 30, 2024, December 31, 2023, and September 30, 2023, totaled NT\$2,369,247 NT\$2,189,936, and NT\$2,485,170, respectively.
- C. The following table shows the Group's non-derivative financial liabilities and derivative financial liabilities closed on a net or aggregate basis, grouped according to the relevant maturity dates. Non-derivative financial liabilities are analyzed according to the remaining period from the balance sheet date to the contract maturity date; derivative financial liabilities are analyzed according to the remaining period from the balance sheet date to the expected maturity date. The amounts of contractual cash flows disclosed in the following table is the undiscounted amounts.

### (III) Information on Fair Value

- 1. The hierarchy of valuation techniques used to measure the fair value of financial and non-financial instruments are defined as follows:
  - Level 1: quoted prices (unadjusted) in the active market for the same assets or liabilities that an enterprise may acquire at the measurement date. An active market is a market in where assets or liabilities are traded with sufficient frequency and quantity to provide pricing information on a continuing basis. The wealth management products invested by the Group is included.
  - Level 2: The observable input value of the asset or liability, directly or indirectly, except for the quotation included in Level 1. The fair values of hybrid instruments, derivatives and accounts receivable expected to be sold invested by the Company are all included.
  - Level 3: non-observable input value of the asset or liability. The equity instruments with no active market invested by the Group are all included.
- 2. For the fair value information of investment property measured at cost, please refer to Note 6, (13).
- 3. Financial instruments not measured at fair value
  - Includes cash and cash equivalents, assets measured at amortized cost, notes receivable, accounts receivable, other receivables, short-term loans, notes payable, accounts payable, other payables, corporate bonds payable (including those maturing within one year or one operating cycle), long-term loans (including those maturing within one year or one operating cycle), and the carrying amount of security deposits received is a reasonable approximation of fair value.
- 4. The Group classified financial and non-financial instruments measured at fair value according to the nature, characteristics and risks of assets and liabilities and fair value level. The relevant information is as follows:

- Liabilities: None.
- (2) The methods and assumptions used by the Group to measure fair value are described as follows:
  - A. When evaluating non-standard and less complex financial instruments, such as debt instruments with no active market, the Group employs valuation techniques widely used by market participants. The parameters used in the evaluation model of such financial instruments are generally market-observable information.
  - B. The evaluation of wealth management products is to use the net value of the market price as the input value of the fair value (that is, the first level).
  - C. The valuation of derivative financial instruments is based on valuation models that are widely accepted by market users, such as the discounting method and the option pricing model. Forward foreign exchange contracts are usually evaluated based on the current forward foreign exchange rate.
  - D. The Group incorporates credit risk valuation adjustments into the fair value

- calculation of financial and non-financial instruments to reflect the credit risk of counterparties and the Group's credit quality respectively.
- E. The Group's equity investments with fair value classified as Level 3 are mainly investments in domestic unlisted companies. The valuation process for these investments is carried out by the Finance Department, which regularly uses the net asset value method for valuation and measurement.
- 5. There were no transfers between Level 1 and Level 2 from July 1 to September 30, 2024 and 2023, and January 1 to September 30, 2024 and 2023.
- 6. There were no transfers in or out of Level 3 from July 1 to September 30, 2024 and 2023, and January 1 to September 30, 2024 and 2023.
